Nagpur, Maharashtra, India

Objective

Generative AI Developer with hands-on experience building end-to-end AI applications using LLMs, RAG pipelines, vector databases, and FastAPI. Currently contributing to AI initiatives at TCS and developing solutions including multimodal assistants, resume automation tools, and industrial decision-support systems.

Technical Skills

Programming: Python,Java
Generative AI & LLM: Prompt Engineering,RAG,LLM Applications, AI Agents,Embeddings,Vector Search,Multimodal AI
Frameworks & Libraries: FastAPI, LangChain**,** React.js, Django
AI Models & Tools: Qwen2-VL, Whisper, YOLOv8, Hugging Face, BGE Embeddings
Data Analysis & Processing: Pandas, NumPy
Tools: Git**,**GitHub, Postman, Jupyter Notebook, VSCode
Databases & Vector Stores : MongoDB, MySQL, SQLite, FAISS,ChromaDB
Soft skills: Active Listening, Creativity, Adaptability, Team Collaboration

Projects

Smart Technician Assistant | Generative AI & Multimodal AI | GitHub

Tech Stack: Python, FastAPI, RAG, Qwen2-VL, Whisper, YOLOv8, BGE Embeddings, FAISS

- Architected an AI-powered assistant for industrial maintenance and troubleshooting.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using manuals, SOPs, and technical documents.
- Integrated speech-to-text and image understanding capabilities using Whisper and vision models.
- Enabled multimodal interaction through text, voice, and image inputs.
- Built APIs using FastAPI for seamless AI service integration.

Resumin AI | AI Resume Builder | GitHub

Tech Stack: Python, FastAPI, LLMs, Prompt Engineering

- Developed an AI-powered resume assistant for resume generation and enhancement.
- Generated role-specific resume content using Large Language Models.
- Provided ATS-friendly suggestions to improve resume quality.
- Designed an intuitive workflow for creating professional resumes efficiently.

Federated Model for Malware Detection

Tech Stack: Python, Federated Learning, Machine Learning, Neural Networks

- A Federated Learning–based malware detection system that allows multiple clients to collaboratively train a secure, privacy-preserving model with improved accuracy. Developed a REST-based backend with a distributed training pipeline for scalable, real-time malware detection across diverse devices.

Internship Experience

Generative AI Intern | Tata Consultancy Services (TCS)

March 2026-Present

- Contributing to enterprise Generative AI solutions using LLMs, RAG architecture, and FastAPI for intelligent automation and knowledge retrieval.
- Collaborating with cross-functional teams to design, develop, and evaluate AI-driven applications for real-world business use cases.

Education

B.Tech in Computer Science and Engineering (CyberSecurity) | GPA:8.67
St. Vincent Pallotti College of Engineering and Technology, Nagpur | 2022 – 2026

Achievements

- **Awarded** Best Paper **at** AIDCON 2025 (International Conference on AI-Driven Engineering & Technology) **for presenting research on "*Intelligent Media Authentication with Identity Marking and Real-Time Forensic Reporting*".** |Award and Certificate
- **MERN Stack App Development:** TechSaksham, initiative between Microsoft and SAP. | AppDev Certificate
